Annotation: It is remarkable, that the vice president of Zimbabwe, Mrs. Mujuru, finances this business of her of her daughter. It is about millions of US-Dollars. There is evidence to suggest that Nyasha del Campa with her husband Pedro and her mother Joice Mujuru practise dubious business with conflict gold and diamonds from Congo. Therefore they outcast intentionally against the UN embargo. With these proceeds are to be bought weapons for the country and this will be a resource for the Congo-war.

In the meantime there die in their own country, in Zimbabwe, many people die of Cholera, because they are lacking water, which only costs some cents and can save life.
